# The Coleman Journal

Most Effective Advertising Medium reaching the People of Town and District. The Journal goes into the Homes.

Volume 24, No. 16.

THE JOURNAL, COLEMAN, ALBERTA THURSDAY, AUGUST 30, 1945. \$2.00 Per Year; Single Copy 5c.

## S.C. Short Heads Coleman's Reception and Rehabilitation Committee; Nominating Committee Chosen

Full Slate of Committees to be Presented at Next General Meeting; Geo. Derbyshire and A. Wilson Vice-President and Secretary-Treasurer Respectively.

The first meeting of Coleman's Reception and Rehabilitation Committee was held in the council chamber on Tuesday evening with fifteen local organizations represented. S. C. Short was chairman. Also present were W. H. Chappell and F. J. Lote, of Blairmore and Mr. Reese, Veterans' Welfare officer.

Mr. Short was chosen as permanent chairman of the organization, while George Derbyshire was appointed vice-president and Adam Wilson secretary-treasurer.

Mr. Chappell and Mr. Lote addressed the meeting giving a description of the Blairmore set-up. Blairmore's organization is broken up into five committees—advanced information, welcome and transportation, entertainment, rehabilitation and war brides. It was agreed that in order to get the best material for these committees that a nominating committee be appointed to survey the town and appoint to the respective committees the most competent citizens that the town had to offer. Nominating committee comprises Chairman Short, Secretary Wilson, Mayor F. A. Bousaff, J. J. McIntyre, W. White, R. Parry and Mrs. Martland. This committee will present their list of committee members to a general meeting to be held in the near future.

## Modern Electric Opens New Main Street Store

Spacious Floor Displays Goods to Advantage; Carry Various Lines of Merchandise.

Modern Electric moved from its former store on Central Avenue, which it has occupied for a number of years, to its new premises on main street. The new store which will retain the name of Modern Electric was at one time the Big Corner Store in which Ed. Ledieu operated his grocery store.

The new store has been renovated and painted in a quiet green. The spacious floor shows to advantage several lines of merchandise such as furniture, hardware and electrical goods. Above each display window is a fluorescent lamp which at night fills the interior with dazzling light thus aiding in the floor display.

The proprietor, R. A. Montalbetti, at the end of last month resigned his position as chief electrician at McGillivray Creek to devote his full time to electrical work, new and repair, at the store. He has eighteen years electrical experience, eight years radio experience and two years experience with refrigeration. His shop is equipped to handle service on all commercial and domestic refrigeration plants.

Electric washers he expects to receive at various intervals, while he expects to have a new refrigerator on the display floor in early December.

Modern Electric opened for business on Tuesday morning and a number of shoppers took the opportunity of entering the store and inspecting the new stock.

## LIONS' PLAY HOUSE RAFFLE POSTPONED

Decision to postpone the date of their raffle on the child's play house has been made by the Lions club. The draw is now scheduled to take place at the club's charter night ball this fall.

Cause of the postponement is mainly due to the fact that many citizens have been on vacation all through the summer and the ticket sale has not met expectations. A brisk selling campaign is expected to get underway once school commences and conditions get back to normal.

## WORKMEN FIND 1906 AND 1907 COPIES OF NIAGARA FALLS PAPERS

While working in the basement of International office a gang of men uncovered two very old papers, one being the Cataract Journal, Dec. 6, 1906, and the other The Niagara Falls News, of Nov. 27, 1907, both papers being published at Niagara Falls.

The first thing that struck the eye upon examining the News was the amount of space given to headings. Today when space is at a premium it is in sharp contrast to 1907 when space was apparently plentiful and greatly used with large display headings.

Considerable progress has been made in the engraving field. Both papers carried pictures which are dull and have grayish backgrounds. Today pictures are published sharply and clearly.

## Dan Daly Returned Home From Overseas Last Week

Dan Daly, son of Mrs. E. Daly, arrived home last week after three years overseas, which took him into France, Holland, Belgium and finally Germany.

He was an employee of International factory while enlisting with the Edmonton Fusiliers in October, 1941. He went overseas in 1942.

Dan has been busy renewing acquaintances since his return home and has had a party in his honor sponsored by friends.

## Bellevue Flower Show To Be Held Monday

1,000 Entries Have Been Received With Prize Money of \$600; Sports and Dance to be Held Along With Show.

On Monday next all roads will lead to Bellevue arena, where the Bellevue and District Horticultural Society's annual flower and vegetable show will be staged.

There has been another large entry received of flowers, vegetables, handwork, school art and domestic science. Judging will be done in the morning, with the doors open to the public from one to seven p.m. Large and small parcels of winning flowers and vegetables will be auctioned off at 7 p.m.

In addition to the show there will be a sports program sponsored by Bellevue Lions in the morning, while in the evening a dance, sponsored by the Rebekahs, will be held in the IOOF hall.

For the information of exhibitors it is necessary that they submit their entries on or before 6 p.m. on Sept. 1. No entries will be received on the morning of the show.

## FUNGUS CHEMICAL MIGHT BE REMEDY AGAINST TB

Ray Brook, N.Y.—Discovery of another fungus chemical that might develop into a remedy against tuberculosis was announced by Dr. Joseph M. Kurung. The fungus, called aspergillus ustus, stops growth of TB germs on culture medium in the laboratory. Tests with mice show it is relatively non-toxic, suggesting it might be used as a remedy.

## SIDNEY THOMAS ARRIVES FROM OVERSEAS

Last week end Private Sidney Thomas arrived in Calgary from overseas and was met by members of his family. He had been overseas for several years and was wounded on the Western Front. Upon arrival in Calgary he was taken to a military hospital for further treatment.

## MAE MOORES RETURNS HOME

Two weeks ago Nursing Sister Lieut. Mae Moores dropped quietly into town to visit her brother and new sister-in-law, Mr. and Mrs. Doug. Moores. Mae only recently arrived from overseas after almost two years service in the Italian theatre of war, where she met some of the Coleman boys.

Following her visit here she left for the west coast, where she is now visiting her parents, Mr. and Mrs. Sam Moores.

## Laird McLeod Returns Home From Overseas

Cpl. L. A. McLeod last week returned home after serving more than five years overseas. He enlisted at the outbreak of war in September, 1939, and in June, 1940, went overseas. He was with the Canadian forces when they went into France. He was a member of the Royal Canadian Engineers and served in Holland, Belgium and Germany. Prior to enlisting he was an employee of McGillivray Creek.

## Interest Rises In Carnival Mystery Chest

Contents to be Placed on Display This Saturday; Committee Endeavouring to Boost Prize Values.

Interest is gradually mounting in the contents of the Mystery Chest which the Curlew and Elks are sponsoring as the major prize in the carnival to be staged in the arena on Saturday and Monday, Sept. 8 and 10.

The contents will be revealed on Saturday and will consist of merchandise and valuables and will be well worth the purchase of a ticket. The draw will be made at midnight on Monday, Sept. 10.

An effort is being made by the carnival committee to boost the grade of prizes and carnival chairman Wilf Dutil will have a statement on this point next week.

## PRETTY WEDDING AT U.S. CHAPEL IN EDMONTON

Against a background of gladioli, carnations, asters and fern in the U.S. army air base chapel Friday evening, August 17, Owen Gwyneth Bell, daughter of Mr. and Mrs. Allan J. Brown, of Coleman, was united in marriage to S/Sgt. Pardon T. Brown, USAAF, son of Mr. and Mrs. Walter C. Brown, of Piqua, Ohio. The ceremony was performed by Sqd. Ldr. J. A. Forbes, RC AF, head chaplain, Northwest Air Command.

The bride, who was given away by her father, wore a powder blue semi-formal dress, length dress and wore a corsage of American Beauty roses.

The bride's only attendant was Mrs. J. B. Baker. Mrs. Baker wore a gray blue dress.

The best man was Sgt. John William Whitehead, USAAF.

The wedding music was played by T/Sgt. Lester J. McClellan, USA AF.

A reception to about 25 guests was held at the home of Mr. and Mrs. Fred Brown.

The couple left on a honeymoon trip to Banff, the bride travelling in a green jersey dress. Upon return they will reside at 10306 124 Street, Edmonton.

Mr. and Mrs. Joe Colombo and son, Russell, have returned home after spending a vacation at Creston the guests of Mrs. Colombo's parents, Mr. and Mrs. John Salvador.

## Coleman Mineworkers Demand That Original Municipal Hospital Site Be Maintained

Resolution Sent to Town Council Asking That it Give its Support to Mineworkers in their Demand; Special Council Meeting Held on Monday Evening.

On Sunday afternoon mineworkers of Coleman gathered in the Community hall to discuss the decision of the municipal hospital board to change the original site, immediately west of the Oliver Dairy, to a second site immediately east of the number 3 highway steel bridge and north of number 3 highway.

After some discussion and listening to speakers conversant with the situation a resolution was agreed to which stated that Coleman mineworkers would give the Board their support only if the original site was adhered to and that should the original site not be kept that Coleman Town Council be asked to set

in motion the necessary machinery to detach School District 1216 from Municipal Hospital District No. 40. This resolution was received by council on Monday morning. A special meeting was called for that evening and in the meantime Mayor Abovsky and Councillor Wilson contacted the hospital Board in an endeavor to have the Board use its every effort to get the original site. This they were successful in accomplishing as Board will again make representation for the original site, provided that no legal action was necessary.

As a result of this council went on record supporting the Hospital Board as long as the original site was still trying to be secured, but failing to secure the original site council had no alternative but to set machinery in motion to detach School District 1216 from the municipal hospital district.

## Chick Roughead Won Dutch Tennis Tournament

Defeated Junior Champion of Holland; Represented his Division in Dutch-Canadian Tourney.

Chick Roughead has lost none of that championship form which saw him rank number four in Alberta tennis rankings prior to his enlisting in the Canadian army. He has been playing tennis in Holland in recent weeks with great success. He tells all about his performances in a letter to his parents, Mr. and Mrs. Wm. Roughead, and we let the letter tell the story:

"Here I am again, playing tennis. They came for me to represent my division at the Goringham tennis tournament, which I did and won the men's singles.

The Colonel picked six men to represent the army to play at an open civilian tournament at Hilversum, 150 miles from here. There were 150 entries, Dutch and Canadian. I had some hard sets to play. In the finals I met a Dutchman; he sure was good, but I won the men's singles. In winning I got a diploma inscribed in Dutch. It was read to me in English when presented. I also received a branch of silver leaves with my name engraved on it. It's really a swell souvenir. This was the championship of Holland in B Group that I won. I also beat the junior champion of Holland.

"There was a Dutch professional there giving lessons and correcting mistakes. I played with the Colonel in the men's doubles, but got beat in the semi-finals. The Canadian army championships are to be held in a couple of weeks and I intend entering.

"There were close to 500 watching our game. The tennis courts at Hilversum are sure beauties to play on. They are built low down in the ground so that people watching the game are high up and can watch much better.

"I had a grand trip and a swell

time. The folks here treat you good. On the trip I saw a lot of Holland. We went from Assen down to Hilversum coming home. We went from Hilversum to Amsterdam up through the Zuider Zee to Leeuwarden and then down to Assen. I saw all the dykes and where the Germans flooded the land. It's a trip I shall never forget.

"Best wishes to everybody.

Chick." A letter received from Chick, dated Aug. 22, reveals that he won the men's singles of his division against a Captain Mitchell, 7-5, 6-3. His win gave No. 1 ranking of his team of six, which will enter the Canadian army play-offs at Hilversum on Sept. 6.

## UNEMPLOYMENT INSURANCE

Wages paid in lieu of notice are not subject to unemployment insurance contributions, W. H. Darracott, manager, Winnipeg employment office, said Tuesday in a clarification of the requirements of the unemployment insurance act.

There seems to be considerable doubt in some employers' minds as to whether or not insurance contributions are required in respect to wages paid in lieu of notice. Where the employment is terminated immediately and the worker is paid money in lieu of notice the act does not require that contributions be affixed in the insurance books for the period in respect of which money is paid, Mr. Darracott explained.

Neither are the contributions required for monies paid for holidays earned but not taken at the termination of employment. In this case, the monies are added to the last pay period and the contribution rate raised accordingly, Mr. Darracott pointed out. This, however, he said, does not apply in the case of Dominion government employees.

In regard to vacations with pay during employment, contributions are required, but not in the case of vacations without pay while the contract of employment is still in existence.

Bill McLeod is a hospital patient.

Mr. and Mrs. Neil Fleming sr. left on Wednesday for Kalspell, Mont., on the start of a two weeks vacation.

Miss Mary Moezel, of Winnipeg, left for her home on Wednesday after visiting her brother and sister-in-law, Mr. and Mrs. Bill Moezel, for the past two weeks.

## Drinking Water Supply Impure

All water consumers within the Town of Coleman are warned to boil all water for drinking purposes as the latest analysis shows it to be impure in its present state.

Turkey endorses the principle of international freedom for the Dardanelle straits enunciated by President Truman.

The legislative Yuan unanimously ratified the United Nations charter, adding China to the list of nations which have subscribed to it.

London's transport trains, buses, trams and trolley-buses travelled 446,000,000 "vehicle" miles last year and carried 3,370,000,000 people.

Peter Anderson, 77, first Canadian soldier to escape from a German prisoner of war camp in the First Great War, died recently at his home in Vancouver.

The first of a new type of motor lifeboat with twin engines, designed by the Royal National Lifeboat Institution, has been built at Cowes, Isle of Wight.

The harbors of Kristiansand, Oslo and two other unnamed Norwegian ports have already been cleared of mines. Over 21,000 were planted in Norwegian coastal waters.

Sir Alexander Fleming, discoverer of penicillin, has received the freedom of the London borough of Paddington, fourth man in history to achieve that honor. The other three were former mayors.

The town council of Aldershot, England, decided to invite every member of the Canadian Army who served overseas in this war to become a freeman of the borough.

The gold medal of the Royal Society of Medicine has been presented to Brig. Sir Lionel Whitby for distinguished research work on wound shock and the transfusion of blood and blood derivatives.

## Art Forgery

Perpetrated In The 18th Century Has Been Exposed

An art forgery perpetrated in the 18th century has been exposed by the Metropolitan Museum of Art in New York, through infra-red photography.

The museum—which never was deceived by the false signature—said an unscrupulous art dealer in the 1850's forged the name of Andrea Mantegna on a painting over that of the real artist, Vittore Carpaccio.

Although the forgery was known when the picture was bought by the museum, it could not be proved until Murray Pease, associate curator, decided the painting should be cleaned. Microscopic examination, microscopy, technical photography, tests with solvents and radiographs (similar to X-rays) failed to reveal the fraud.

At last, under infra-red exposure, the signature of Carpaccio was seen clearly.

The museum said the two artists were contemporaries, but that Mantegna's work was considered more valuable at the time of the forgery. The painting is "Meditation on the Passion", a picture of Christ seated on a broken throne after the crucifixion.

## SHOULD BE RE-NAMED

Democritus, the Greek scientist and philosopher, who lived anywhere from 370 to 460 years before Christ, coined the word A-tom, meaning "not divisible" in order to signify a fundamental particle of matter so firm and small that it could not be further divided or smashed. Democritus, obviously, didn't anticipate that man would ever succeed in smashing the atom, when he gave the mighty molecule its name.

Mustard gas was by far the most devastating gas used in the First Great War.

Buy War Savings Stamps regularly.

By Fred Neher

"I want to play after you're through, dear, so don't lose OUR ball."

**HEAT FOR 50 YEARS**—New atomic energy will mean the end of heating problems and that pill-bottle filled with uranium would heat a home for 50 years, say the scientists.

## Will Be Big Job

Japan's Territory To Be Cut By 600,000 Square Miles

Squeezing Japan back to 1895 dimensions, the program agreed upon at the Cairo conference and confirmed at Potsdam, means shrinking the 750,000 square miles of territory claimed by the Nips before Pearl Harbor to about 150,000 square miles. The difference is the area acquired between 1895 and 1941.

Pormosa was the first of the Japanese territorial gains in the period. In 1894 Japan made war on China, to acquire this 14,000-square-mile island. In 1895 China was forced to cede it to her. The population of Pormosa was around 5 million, mostly Chinese, and the majority of the island's people still are Chinese.

Before Pearl Harbor, aggressive Japan, in addition to Pormosa, had acquired possession or control of the southern half of Sakhalin island (1905), Liaoting peninsula with its seaport, Dairen (1905), Korea (1910), Manchuria (1931), a large area in Northeastern China (1937-41), and French Indo-China (1940). Japan acquired a mandate over the Marshall, Caroline and Marianas islands (except Guam) as a result of World War I.

The greatest loss to the Japanese empire will probably be Korea, which they claim outright, together with their control over Manchuria, which the Japs officially call the Empire of Manchukuo. Both have strategic value, particularly against China and Soviet Union. Their possession made the invasion and conquest of much of China possible in the present Chinese-Japanese war. Their greater value to the Nips, however, is their resources. They have furnished the Jap home islands with great quantities of foods, textiles, coal and the minerals that made the construction of war equipment possible.—Brandon Sun.

## Movie From Front Lines

Must Be Approved By General Eisenhower Before Being Shown

"The True Glory" is reported to be the most expensive movie film ever made, and was shown recently to a select audience at a private showing. The original length of the film was more than 6,500,000 feet, which were cut to a mere 8,000. "It was photographed by 1,400 cameramen in the front lines of battle, and 336 of them lost their lives, while 161 were wounded. Total cost is computed at \$28,000,000. The picture tells the story of battles in Europe from D-Day until the end of the European campaign. It will not be distributed for public showing until it has been fully approved by General Eisenhower.—News, Toronto.

## SUNDAY SCHOOL LESSON

SEPTEMBER 2

JOSEPH'S PLACE IN GOD'S PLAN

Memory Selection: Seest thou a man diligent in his business? he shall stand before kings. Proverbs 22:29. Lesson: Genesis 37:39-41, 45. Devotional Reading: Isaiah 12.

The Text Explained With Comments  
The account of Joseph as it appears in the Old Testament occupies one-fifth of the book of Genesis, and is one of the most beautiful narratives in the entire Bible. Scholars and literary critics agree that there is nothing finer in the way of dramatic recital to be found in the Scriptures. The life story of Joseph runs the gamut of life, from slavery to sovereignty, from Bedouin tent to palace, from prison cell to the throne. But our interest is in the character of the young man rather than in the literary skill of the narrator.

The popular Youth, Genesis 37:12-17. Joseph started life with many advantages for one who is to become a religious leader. Joseph was his father's favorite son, he seems to have a spiritual, mystical nature, which equipped him to appreciate the family's religious heritage of divine promises and covenant obligations. As Joseph meditated on the ideals and high standards of a covenant-keeping family, a tension gradually arose between him and his more worldly materialistic brothers. There were other reasons, too, for this dissension. Joseph was the child of his father's favorite wife, and in a polygamous household this constituted a difficult situation. Seldom, if ever, has there been peace in a household where love had to be divided, and Jacob's household was no exception. Again, Jacob showed the boy many favors above his brothers, and this caused no little friction. Some have suggested that Joseph allowed his favored position to go to his head, becoming insufferably conceited. Perhaps his brothers can be forgiven a part of their malice, for the youth provided them with abundant provocation. So he was shunned by the rest of the family and thus missed the fellowship of family life. Finally, Joseph seems to have been sheltered from hardships, being allowed to live in luxury while the other sons were expected to do a full day's work in the fields and with the flocks. Joseph lived in a world of dreams and looked down upon his brothers who did not measure up to the family ideals and standards. Then God took a hand in his affairs.

## SERVICE CLOSED

Immediate closing of the national blood donor service of the Canadian Red Cross society and plans for a three-month survey of the blood needs of Canadian hospitals in this country with the view of a peacetime service were announced by Norman C. Urquhart, chairman of the national executive committee.

The four-horned animal is the only living wild four-horned animal.

## Educational Work

British And Canadian Troops Improve Their Education In Berlin

British and Canadian troops in Berlin have an opportunity to improve their education under the direction of army educational corps officers. Attendance is compulsory up to a minimum of six hours a week.

Current affairs must be studied by all troops at least one hour per week, but aside from that compulsion does not enter in the choice of subjects.

Troops are taught how Great Britain, Canada and other members of the Commonwealth are governed and how the foreign relations are conducted in each country.

In its educational work the army collaborates with the Ministry of Labor so that men leaving the army will be ready to take vocational instruction designed for particular jobs.

## Might Help Sightless

Radar Being Investigated By St. Dunstons Institution For The Blind

A research unit to find out if radar might be used to help blind persons on the basis of "round reflection" is to be set up by St. Dunstons, Britain's famous institution for the blind.

Through this new aid it is hoped sightless persons will be able to tell not only when they are passing a building but will be able to visualize its size and appearance.

A talented wife is one who can get home 15 minutes before her husband and make it look as if she had been there all day.

## Historic Furrows

Fields May Be Plowed In The Italy That Virgil Knew

A primary and sensible step toward Europe's bread supply is to be taken this Autumn, with America's plows and tractors at work in many of the countries where American tanks rolled not long ago in deadly harvest.

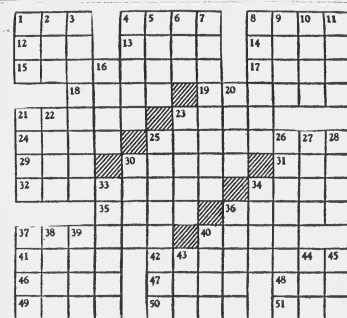

It is interesting to consider that by this aid fields may be furrowed in parts of Italy which a wartime Virgil knew in 41 B.C. when his father was driven from the family farm as a result of confiscation lands for the successful soldiers of Octavius and Antony.

But one can know that such furrows will turn faster than in the days of the plow, plowing oxen of the Elogues—even if unmotivated kelp of wheat can sprout for today's hungry populations only in the same stony, green way as at the time of the Battle of Philippi.—New York Herald Tribune.

## Remote Garrison

Demobilization At St. Helena May Be Delayed

Demobilization has posed an unusual problem for an officer and four other ranks in the British Army. They are part of the garrison of St. Helena, the island 1,200 miles off the African coast where Napoleon died in exile, and there is no certainty there will be a ship to bring them home. Even in peacetime ships for England called at St. Helena only once in four weeks.

## OUR COMPLETE SHORT STORY— DENNER'S COVE

—By—  
KATHRINE VAN TAILL

McClure Newspaper Syndicate

As long as he lived Barry Graham would remember the end of that picnic. It was during his first college vacation. There were two summer jobs at Denner's Cove and Barry needed one of them; but his friend Jesse Kooling, had come out the week before and was driving the pick-up for the hotel. So that was out.

Barry's clear gray eyes travelled longingly over the clipped lawn which edged the water at the head of the bay. He could see the ten-year-old boy who would have a tutor and companion during the season. Especially a companion—an athletic companion—the best swimmer available.

That was Barry, of course. It was the job Barry wanted because it paid more than driving the pick-up and he'd be in sight of the water most of the time so that he could keep an eye on Kent. The difficulty was finding time to qualify to enter the contest.

His lean jaw set as his eyes came back to the houseboat dock where Skipper was wagging his mongrel tail excitedly, waiting for Kent to throw. The stick dangled over the edge of the dock. Skipper retrieved, clamored aboard, spraying everything near him, and laid the stick expectantly at the feet of Barry's younger brother.

"Muffed it again, didn't I?" Kent awkwardly patted the damp head of the stick. "Never mind, fella. Give me a couple more days and I'll be able to do something useful."

"Poor kid," worried Barry. "Hope he doesn't try anything he can't do. Look, Barry!" Kent's exclamation interrupted. "They're anchoring the buoy."

"Mnnh?" grunted Barry. "S' matter? Aren't you interested?" "You know you'll win and there will be no need of a camera either."

"Win? Sure, but I won't enter." "Not enter?" Kent's tone betrayed his amazement. "Quit kidding. Of course you'll enter with that swell job as a reward."

"I'm not kidding. The race is day

after tomorrow. Today I'm driving the pickup until six while Jesse goes to the city. Tomorrow's the picnic, and the sort drink and keep me busy. When shall I have time to swim to that buoy and back so that I can qualify?"

Kent didn't answer. Barry warned him to be careful, then went to the hotel. There was just a chance he'd get through in time to try. But he didn't. A heavy wind storm beat him to it, churning and churning the water into whitecaps, lugging at the houseboat mooring. No swimmer would try to buck that bubbling soup kettle except in an emergency.

"Some storm!" greeted Kent. "It will be hours before that quiet's down," Barry declared, staring at the bay.

"Jesse qualified just in time," volunteered Kent. "He went out after lunch. The caps were beginning to show before he got back."

"But Jesse was in town. I met him on my last trip to the village."

"That's queer," mumbled Kent. During the night the wind died down, but the water was rough. Barry examined the houseboat moorings before they started for the picnic, for today the cove would be deserted.

He showed his pace to that of the convalescent as they hiked along the houseboat which had drifted to the other side of the peninsula. Skipper trotted sedately beside Kent.

At the grove Kent sat for a long time on a bench near Barry's booth and then wandered about, watching the fun. Barry wasn't surprised, therefore, when shortly after dinner Kent came to him. "Skipper and I are going back to the boat. Guess I can't take it."

Barry watched the boy and the dog disappear along the walk. He should have gone, too. If anything happened to Kent it would be his fault. If he had the slightest inkling that he'd not be able to qualify for the swim he should have persuaded his parents to allow Kent to come to the cove so soon.

The distant strident of a motorboat lessened his anxiety. Towboat Toni was at the cove and would keep an eye on the kid. Yet there was an uncertainty he could not quite shake off, which developed into real fear when late in the afternoon Skipper appeared, barking frantically, urging Barry to hurry. Something had happened to Kent! Skipper's coat was wet.

"The houseboat!" There was no one to hear Barry's startled exclamation, not even Skipper, for he had jumped from the wharf and was swimming to their summer home ahead in the choppy waves just beyond the buoy. Kent was clumsily waving a makeshift signal. Kent, alone on the floating vessel, unable to leave the anchor!

Towboat Toni was nowhere in sight. The only launch was at the hotel mooring. No rowboat was near. Barry kicked off his shoes and clothing, plunged. He reached the buoy in less time than even he believed possible.

"Good going, big brother!" shouted Kent as soon as Barry was within earshot. "Swim around the buoy and back to the wharf. We're anchored and Toni will tow us back as soon as you're out of the way. He's around here on the other side of the boat."

Barry redoubled long enough to shout: "If it weren't for your lame back I'd thrash you! You've got that coming, kid."

"Swim back to your soda pop, fella," laughed Kent. "You wouldn't have qualified otherwise."

## Weighing Hogs

Farm Hog Scales Are Now Available At Cost

The hog scale, specially designed for weighing pigs under farm conditions and made available to farmers at cost price by the Dominion Department of Agriculture, has been proving helpful to hog raisers in estimating the weight of hogs with accuracy. Live stock feedmen of the Production Service, Dominion Department of Agriculture, are stationed in every province. A letter to the senior representative in the various provinces as listed below will bring complete information as to price, nearest supply, and condition of purchase:

British Columbia—T. G. Stewart, 605 Credit Bureau, Vancouver.

Alberta—N. Curtis, 107 Elway-Harry Building, Edmonton.

Saskatchewan—J. H. Coles, 416 Post Office Building, Regina.

Manitoba—J. Norquay, 630 Dominion Public Building, Winnipeg.

## STILL, GOOD TARGET

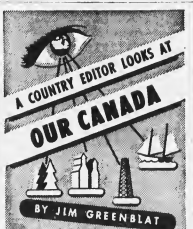

Two Irishmen arranged to fight a duel with pistols. One of them was very stout, and when he saw his lean adversary facing him he raised an objection.

"Reduced!" he said. "I'm twice as big a target as he is, so I ought to stand twice as far away from him as he is from me."

"Be aisy now!" replied his second. "I'll soon put that right."

Taking a piece of chalk from his pocket he drew two lines down the stout man's coat, leaving a space between them.

"Now," he said, turning to the thin man, "fire away, ye spalpeen, and remember that any hit outside the chalk mark don't count."

✦ The Canadian scene: John Dolg of Listowel, Ont., at 75 years is looking forward with joy to the immediate future when he will be able to walk with artificial legs again; a noted step dancer, he lost both legs five years ago. . . . A town hylaw now at Vol d'Or, Que., says "Members of the feminine sex cannot longer wear shorts within town limits!" . . . George Staszuk of McElhenry, Sask., 72, swam across Lake Manitow and back before breakfast recently. He is the father of 13, five of whom were in the service. . . . Sapper Nick Delmer, of Daysland, Alta., 23, got back from the wars wearing a 35-lb. plaster cast on the upper part of his body. . . . John McBride, a Hamilton visitor at Howdenville, Ont., fought one whole hour to finally land an 18-lb. pike, when trawling for bass with plug for bait. . . . Pilot Mound, Man., folks eyes popped when they saw a pile of snow on the street on a warm August day; but it was dumped there from the local freezing plant. . . . At Mount Forest, Ont., a citizen petitioned council to pass a hylaw making it unlawful for roosters to crow early in the morning. . . . The Powell River, B.C. News crows that two of its service men who married English wives, have babies which won beauty contests in this country. . . . Our last reported hollywoods were pigmies, as Mrs. Mason who runs a general store at Cedar Brace, near Newmarket, Ont., has some measuring 14½ inches. . . . They have winds in the Cypress Hills, Sask. Mrs. Moir was sitting outside her house, when she heard a whistling noise, saw her 30 ft. chicken house go up in the air, and came down upside down.

✦ For five years now the famous Pictou (N.S.) Highlanders have paid the expenses of hospitalization and treatment of 9-year-old crippled Betty Halloran. The big hearted Canadian fighters saw her early in the war when they were on a march in Guyborough County, hobbling along the road on a makeshift crutch, and cheering the men. There's enough money in the fund now to look after her education after she leaves her wheelchair for good. Each week she gets letters and souvenirs from her grand benefactors, many of them from overseas. Thanks to Sussex (N.B.) King's County, B.C., for this swell story, even if we have to brief it.

✦ For the adventurous: Work is being started at once on clearing and breaking 100,000 acres of land in the Peace River, Spirit River and Grand Prairie constituencies for settlement, under a special legislature act. The land will be available first to servicemen, then to civilians. Under agreement with federal government service men can receive a grant of \$2500.

✦ My asthma's been bothering me," laconically said 74-year-old J. P. Riley, as he started out from Ponoka, Alta., to Vancouver, with his bag and baggage lashed to his wagon in the style of the 1880's. "Figured I better head for the coast." He expected to make the long haul in forty days, camping along the way and living the life of Riley.

✦ Here's family longevity: David Cudlitz passed away at Forest, Ont., August 1, at age of 96. Predeceased by brothers, William 94, John 82, George 72, Alfred 83, Joseph 75. His father died at 98, his mother at 82.

✦ Record of service: Residents of the western section of Leeds township who pay tribute to the municipality will miss the chery and helpful services of W. L. Sliter. He has just resigned after being tax collector for 32 years.

✦ T. E. Howard and Mrs. Stokes were responsible at Morden, Man., for discovering the ancient burial place

of the long departed Moundbuilders, thought to be the last resting place of a very highly placed chieftain. Manitoba Museum officials are working on the mound, which is about 100 by 80 feet, with around 48,000 cubic feet of earth to be moved.

✦ Brain food for Canadians: More than 80,000,000 pounds of fish of all kinds were landed in the Eastern Fisheries Division (Maritime Provinces) in June this year, landed value being about \$4,000,000.

✦ Thank God they are a very small majority of our population and are not worthy of the freedom they enjoy," writes The Shawinigan Falls, Que. Standard, commenting on a group of young men known as the Shawinigan section of "Les Jeunes Laurentians" who sent the council a resolution protesting the erection of a War Memorial in the city to the memory of those who sacrificed their lives in the war.

✦ The British Army never covered itself with "greater glory" than in this war, said Gen. MacArthur, supreme commander for the occupation of Japan, replying to a message of victory congratulations from the King.

✦ The long departed Moundbuilders, thought to be the last resting place of a very highly placed chieftain. Manitoba Museum officials are working on the mound, which is about 100 by 80 feet, with around 48,000 cubic feet of earth to be moved.

## JAPANESE BEETLE

Is Said To Be Invading Canada, In Dangerous Numbers

Canadian Government entomologists are striving to prevent the Japanese beetle from invading Canada in dangerous numbers. The beetle has devastated large areas in the United States fruit belts.

The U.S. Department of Agriculture has found that the beetles are susceptible to the "milky" disease. When soil where the grubs are known to be is impregnated with spore dust of the disease, the grubs will not only resist from the infection but will liberate additional millions of disease spores. These, it is hoped, will eradicate the pest. "Japidemic" is the name of the spore dust.

Many years ago the English scientist, Sir John Lubbock, made a classic experiments and proved that a flying insect has a mechanism of flight unlike that of a bird. He caught a wasp and covered the tips of its wings with gold leaf. Then he watched the glint of the gold closely as the wasp flew from point to point in the sunshine.

He saw there was no "rowing" or flapping action as with birds. Instead, the vibrating wings of the wasp followed a consistent figure-eight pathway through the air.

Under the microscope, the eyes of any insect are revealed as amazing, with an incredible number of lenses. While the Brazilian beetle has to blunder along with a mere seven of these optic facets, the lowly ant flies 50 to be more serviceable. Eyes of the robber fly are equipped with 4,000 lenses, a swallowtail butterfly has 17,000, but even that array is modest compared with the battery of facets ranged row on row in the eyes of certain dragonflies. They have as many as 30,000 separate lenses in a single compound eye.

What Jeremy Taylor called "the discipline of bees and the rare fabric of honeycombs" has attracted the attention of naturalists and the admiration of mathematicians from time immemorial.

Pappus the Alexandrine marvelled at the hexagonal plan of the honeycomb. He said: "There being, then, three figures which of themselves can fill up a space around a point, the triangle, the square and the hexagon, the bees have wisely selected the hexagon, with its many angles because it could hold more honey than the other two."

Smallest of the flesh eating mammals, the shrew is like a mouse with a long snout, along tail and a body length of an inch or less, although some species are larger.

It was the capture of a specimen of the diminutive variety at Ontario's Camp Billie Bear nature school, which devoured a surprisingly large number of earthworms in short order, that brought about a discussion of the shrew's appetite.

With a body temperature of 100 to maintain a pace almost continuously. In a test to see how much the wee animal could consume, it ate its own weight of squirrel meat every three hours for three days.

✦ The British Army never covered itself with "greater glory" than in this war, said Gen. MacArthur, supreme commander for the occupation of Japan, replying to a message of victory congratulations from the King.

# Important!

AT ANY MEAL, ANYTIME!

Busy housewives all over the country have learned the wisdom of serving Kellogg's ready-to-eat cereals often. Nothing to mix or cook. Appetizing anytime of day. Easy-to-digest, too!

## RECIPES

### WHEN THE BOYS COME HOME

The lads are coming home and that means celebrations and refreshments. They will appreciate more than ever the home-made cookies and other foods that contribute so much to the success of the party. If it were winter plenty of home-made doughnuts and coffee would set the bill, but these warm days call for bowls of ice-cream punch, and the best accompaniment for punch is cookies.

A punch party is an easy way of entertaining whether the group is five or fifty in number. For a large crowd many hours may be needed to prepare the punch and bake the cookies, but it all adds up to a great deal of fun and satisfaction.

Two good punches to remember are Royal Punch and Hawaiian Punch. Of course punch iced tea with plenty of mint leaves in the bowl is always a refreshing drink. Good accompaniments are Jellies and Cocoa Flake Squares—and here are the recipes:

**Jellies**  
1/2 cup shortening  
1 cup sugar  
2 eggs, separated  
1 teaspoon vanilla  
1/2 cups sifted flour  
1/4 teaspoon soda  
1/4 teaspoon salt  
1/4 teaspoon cream of tartar  
1/2 cups oven-popped rice cereal  
1/2 cup jelly

Cream shortening, add sugar, well-beaten egg yolks and vanilla; beat well. Stir in flour, soda, and salt sifted together. Fold in stiffly beaten egg whites to which cream of tartar has been added. Shape dough into small balls about 1 inch in diameter. Roll in slightly crushed cereal. Place on greased baking sheets, make an indentation in the middle of each ball with the thumb and fill with jelly. Bake in moderate oven (350 degrees F.) about 20 minutes. Yield: 28 cookies (2 1/2 inches in diameter).

**Royal Punch**  
2 cups grape tea infusion, chilled  
4 cups orange juice  
2 cups grapefruit juice  
4 cups gingerale or charged water  
Just before serving, combine ingredients and sweeten to taste. Pour over ice cubes or ice block in punch bowl. Yield: 25 cups.

**Strange Relationships**  
Story About Discovery And Naming Of Uranus Is Interesting

Until 150 years ago the world managed to get along without knowing anything about uranium, the element which was the keystone of research in the atomic bomb. Several strange relationships are associated with the discovery and naming of this element.

The German chemist, Martin Heinrich Klaproth who detected its presence in pitchblende in 1789, named it after the planet Uranus, which had been discovered by his G.D.M. Sir William Herschel, who also made important observations of Mars. Klaproth had risen from apothecary in Berlin, Danzig and elsewhere to the post of professor of chemistry at the Royal Artillery, and so must have been intimately informed on the manufacture of bombs. His son, Heinrich Julius, however, was a scholar of an entirely different order.

He became one of the foremost Orientalists of his time, served at the academy in St. Petersburg, and wrote a valuable work on the history of Japan. He could hardly have foreseen that a laboratory discovery by his father was destined 156 years later to leave its mark on Japan itself as well as on the history of science and of the world.—New York Sun.

A process of manufacture to protect vitamins in milk was among the 450 patents granted by the United States Patent Office.

Emperor Wang Mang, about 1 A.D., nationalized Chinese land and distributed it in equal shares among the peasants.

## NOTES AND COMMENTS

### Horses Damage Gardens

Year after year complaints are made against horses damaging gardens. These animals use their weight to force gates and knock down fences to get onto lawns and into vegetable gardens much to the disgust and anger of gardeners.

This week two horses, one brown and one a sand color, played havoc with a garden one night by tearing up carrots and trampling indiscriminately over other vegetables and flowers. Surely the gardener should be given some protection against these animals.

Possibly if horse owners were given a stiff jolt by being made to compensate the gardener to the full extent of the damage done they would be careful that their animals were securely tied to a post before retiring for the night. If the powers-that-be desire to have a more beautiful residential section with lawns and gardens they must take steps to eliminate this roving horse nuisance.

### Improved Service

One cannot help but remark on the almost overnight improved service the motorist is receiving from gasoline pump attendants these past few weeks since gasoline rationing went by the boards.

Today, when one stops at a pump, the windshield is promptly cleaned, tire pressures checked and the water in the radiator enquired about by a second attendant while the chief attendant takes care of your gasoline needs. These little additional services were really missed during the war years and those garages which have been quick to give the added service will find that it pays dividends.

### Let's Finish The Job

It is doubtful if any town the size of Coleman in this Dominion of ours has done any more for its armed force personnel than has Coleman. Each month since 1940 each local boy or girl that went overseas received 300 cigarettes from the Overseas Welfare Fund. Each Christmas they received either 600 cigarettes or 1,000, depending on the number of organizations that combined to send cigarettes. Each Christmas they received parcels from the Ladies' Auxiliary, BESL, regardless of whether they were overseas or remained in Canada. Each Christmas each one received a Christmas message from the Legion. In addition we have the students of Cameron school sending parcels to former students, we have the ladies of the Salvation Army sending parcels to a number of soldiers, Elks and Lions sent cigarettes and parcels to their members in the armed forces. The Red Cross, the Ladies' Evening Auxiliary, the Salvation Army and Girl Guides sent goods to aid the European needy. Other organizations, such as the Polish, Russians, Ukrainians, etc., sent money and goods to aid their countrymen. The citizens of Coleman gave two ambulances. There are undoubtedly other deeds not recorded. We have a proud Victory Loan record.

One thing more remains to be done, and that is aid in the rehabilitation of the boys and girls when they return home. It is a big job, but Coleman is equal to the task. Every citizen should get behind this organization and so make it easier for the soldier to step out of his uniform on to civvy street. There must be a job, a home available, friendly advice given in their problems and a friendly atmosphere prevail throughout the town.

### STRIKES AND LOCKOUTS DURING JUNE, 1945

A decrease of 73.7 per cent in time lost due to strikes in the first six months of 1945, compared with the same period of 1944, is announced by the Dominion department of labor.

Figures for the first six months of this year show 82 strikes, involving 25,208 workers, with a time loss of 83,723 man-days, as compared with 113 strikes, with 48,194 workers involved and a time loss of 318,288 man-days, for the same period in 1944.

June, 1945, compared with June a year ago, also showed a sharp decrease in the number of strikes reported and man-working days lost. Twelve strikes were reported in June of this year, involving 2,773 workers, with a time loss of 4,688 man-days, as against 23 strikes, involving 5,980 workers and a time loss of 9,528 man-days in June of 1944.

Two strikes were reported as un-terminated at the end of June.

# THE MUSIC OF THE PIPES

By M. A. J.

Most people are familiar with the simple reed or shepherd's pipe and more especially still, with the green straws in the fields which when pulled and blown through emit certain sounds. No doubt, if the pipes were not already in existence, they would again grow out of this simple straw, slowly but surely. It was quite natural that people should try to form sounds by blowing through a tube, and afterwards to vary the sound, either by varying the size or shape of the tube by fitting into it some special mechanism. In fact we learn from ancient history that the strain of blowing these early pipes was so great that the player had to bandage his lips and cheeks with a leathern muzzle.

The first real bagpipe had no drones, but simply consisted of a skin or leather bag with two pipes, through one of which the bag was inflated, the other emitting the sound. This was also the idea for the organ, for the bagpipe is but the organ reduced to its simplest expression.

Gradually, through a process of evolution, drones were added—the bass drone coming first, then one tenor drone about the year 1500 and the third drone during the early part of 1800. These give volume and body to the music and

correspond to the tones of a fine church organ.

The age of Highland music is another guarantee of its excellence. It has stood the test of time, the severest of all ordeals. There are records of pipe tunes being written down as early as 1164. These are still played today. There are some pipe tunes so ancient that their origin cannot be traced, but they have, by means of their own merit, and in spite of the want of the printing press, lived all through the centuries. To the Highlander it was always more than music. It was something which inspired and intensified all his thoughts, and combined with the impassioned lays of the bards, was to him his principal intellectual food, it is "the music of the great bays, the mysterious valleys, and of deep crying unto deep." The Highlander liked variety, too, as is shown by the existence of marches, pibrochs, quick-steps, laments, reels, jigs and strathspeys. He was equally at home with the grave, the gay, or the melancholy.

As to the question whether people of good musical taste can appreciate the music of the great Highland bagpipe, it is a fact that those who have the keenest appreciation and intense enjoyment of the music of such composers as Mozart and Handel and other great musicians, can at the same time

enjoy a pibroch or a strathspey when played by a master hand. Mendelssohn, on a visit to the Highlands, was so favorably impressed by the pibroch that he introduced a portion of it into one of his finest compositions.

The great Highland bagpipe is not fitted to produce all kinds of music, but we should not expect from one instrument that proper to another, or blame the one because it fails to please those who are used to the other. No instrument can produce what it is not constructed to produce. The bagpipe is the true exponent of Highland music and of that there is no shortage.

The hills themselves are its appropriate concert room and among them it pervades the whole atmosphere and becomes part of the air, until one can hardly tell whence it comes. It makes rhythm with the breeze and chimes in with the rush of the torrent, and becomes part of the world in which it is produced. It suits the bare heath, the solitary cairn, the dark pass, the silent glen, and the mountains shrouded in mist as no music ever did or can do, and it is at its best floating across the silent lake where "Distance lends enchantment to the sound."

Mr. and Mrs. Elton Hutton and young daughter are visiting in Kimberley, the guests of Mr. and Mrs. Ken Blain.

## ST. ALBAN'S CHURCH

Rev. W. E. Brown, Rector

### Daily offices:

Mattins 9 a.m. Evensong 7.30 p.m.  
Friday: Choir practice 7 p.m.  
The 14th Sunday after Trinity:  
Holy communion 11 a.m.  
Young people's service 2 p.m.  
Altar flowers August 19 given by Mrs. W. H. Garner.

An appeal is made to all our church people to worship at St. Alban's to help with our work and so build up and extend the kingdom of God.

## ST. PAUL'S UNITED CHURCH

G. A. Kettys, Pastor

### Sunday, Sept. 2:

Morning service at 11 a.m.  
You are cordially invited.  
Sunday, Sept. 9, the service in St. Paul's will take the form of a commemoration of the Battle of Britain. On that occasion we shall honor the memory of those valiant few who were our strong defence in Britain's darkest hour. Such services will be held throughout Britain and Canada on the above date.

...V...

## CHEST SURGERY FAYORED FOR LUNG COLLAPSE

Chicago.—Thoracoplasty (removal of ribs to collapse lung)—once regarded as a desperate expedient in tuberculosis treatment—is now viewed as a "primary agent" for lung collapse, according to the Bulletin of the Chicago Municipal Sanatorium. In a recent survey of 8,000 cases subjected to all types of collapse over the last ten years, the thoracoplasty group showed the best results.

## Announcement

Having purchased the Crows' Nest Bottling Works, effective September 1st, I wish to announce that the same high quality and service of the former owner will be continued.

Our motto will be:

"No Finer Carbonated Beverage."

B. E. (ERNIE) BASSO.

## Appreciation

Having disposed of the Crows' Nest Bottling Works, I wish to express to my many customers my sincere thanks for the loyal patronage during the many years they have been valued patrons.

I feel safe in assuring you that the reputation of this business for quality will be continued under the new owner.

MARK SARTORIS.

WHITE LUNCH CAFE

## A STATEMENT REGARDING

# Gasoline Quality

Imperial Oil Limited will commence supplying ESSO EXTRA and 3-STAR gasolines of their pre-war high quality to motorists, farmers and other consumers throughout Canada at the earliest possible moment.

Due to production and distribution problems involved, there will necessarily be some delay. Gasoline users can be assured that no effort is being spared to hasten this change.

Imperial Oil's extensive wartime research and development will result, as soon as possible, in Imperial gasolines surpassing pre-war standards.

Imperial Oil's production facilities are unequalled in Canada and motorists and others can consequently depend on Imperial Oil—just as they have always been able to depend on Imperial Oil—for the very best petroleum products available.

# IMPERIAL OIL LIMITED

## HUNGRY EUROPE NEEDS MEAT

The shortage of food in liberated Europe is desperate. Meat is one of the most critical needs.

As a great food-producing nation, Canada must, can—and will—help to meet this emergency.

That is why slaughtering has been placed under strict control.

That is why ration coupons will soon be used again by Canadians to buy meat.

There is only one objective:—To reduce meat consumption in Canada in order to provide direct aid for the hungry peoples of Europe.

### Slaughter Control

Farmers who slaughter meat for their own or their farmer neighbor's use are required to submit monthly reports (Form RB-61) and to surrender coupons for the meat they use and sell.

Any excess of meat over the farmer's or his neighbor's needs may be sold only to the holder of a regular slaughter permit.

The minimum amount which a farmer may sell to such a permit holder is one quarter of beef or half a hog carcass. Sheep, lambs or calves slaughtered by a farmer for his own or his neighbor's use may not be sold into the meat trade.

### Locker Operators

Under the meat rationing regulations, locker operators are required to submit a list of their patrons to the nearest Ration Branch Office.

A supply of Consumer Declaration forms is being forwarded to each locker operator who will, in turn, distribute them to his patrons. The patron is responsible for completing the form and filing it with the Ration Branch Office.

Consumers must surrender coupons for all meat held in lockers over and above 4 lbs. for each person in the household at a rate of 2 lbs. per coupon. However, no more than 50% of the "M" coupons in the ration books of the consumer and his household need be surrendered.

## MEAT RATIONING FACTS

Amount of Ration will be roughly 2 lbs. (carcass weight) per person, per week.

**Rationed Meats.** All cooked, canned, fancy and "red" meats.

**Unrationed Meats**—beef brain, head, tail, blood, tripe; calf brain, head; pork brain, head, tail, pigfeet, spare ribs; lamb brain, head, tail, fries; poultry, game and fish (canned or fresh).

**Coupons**—brown "M" coupons in Ration Book No. 5. One coupon will become valid each week.

**Coupon Values**—Group "A", 1 lb. per coupon; Group "B", 1½ lbs. per coupon; Group "C", 2 lbs. per coupon; Group "D",

2½ lbs. per coupon; Group "E", 3 lbs. per coupon.

**Tokens.** Tokens, eight of which are equivalent to one coupon, will be used as coupon change.

Farmers must turn in to their Local Ration Boards a coupon for each 4 lbs. of meat (carcass weight) they use in their households from their own slaughtering. So that they may buy other meats from their butchers, no more than one-half of the valid coupons in the hands of the farmer and his household need be surrendered. Farmers who sell meat to a neighbour farmer must collect coupons at the rate of 4 lbs. (carcass weight) per coupon.

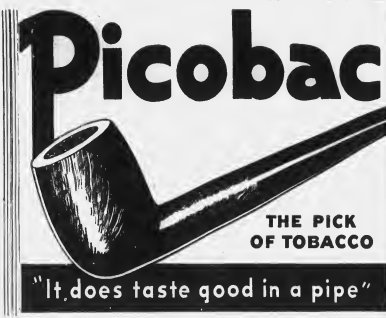

## Rationing

Is your assurance of a fair share.

Is a protection against waste... shortages... inflation.

That is why farmers are asked to continue to collect and turn in coupons to their Local Ration Boards—once a month—in the RB-61 envelope.

**PicoBac**

THE PICK OF TOBACCO

"It does taste good in a pipe"

## Help For Europe

ALTHOUGH THE WAR IN EUROPE has ended, it has not meant the end of suffering, privation and want on that continent. In countries formerly occupied by the Germans, stores of supplies were looted or destroyed, and it has been impossible to bring swift and abundant relief to those people who lived directly under the shadow of war for more than five years. Unfortunately, so complex is the problem of rehabilitation and reconstruction in Europe, that although every effort is being made, complete readjustment cannot be made in a period of weeks, or even of months. In the countries which were held by the Germans, great quantities of food, clothing and other necessities were stolen, and the people have been deprived of the means of renewing them, since many farms and factories were destroyed by the Nazis in their long retreat, or demolished by bombs or artillery fire.

## Fuel, Food And Clothes Needed

Fuel, food and clothing are probably the most essential articles needed for human comfort, and all of these have been, and are now, scarce in most parts of Europe. The people of the United Kingdom have also suffered from a shortage of all these things, and when we compare conditions abroad with those which have existed in Canada during the war, we realize that the people here have been extremely fortunate. Recently a comparison was made between the per capita consumption of food in wartime and in the pre-war years. These figures showed that in Canada, 107 more pounds of food per person are now consumed annually, than was the case before 1939. In contrast, there has been a drop of 11 pounds per person in the United Kingdom; 147 pounds per person in France, and 244 pounds for each person in the Netherlands.

## An Opportunity To Send Help

In the matter of clothing, Canadians have likewise been fortunate. In Europe, as a result of the looting and destruction during the war, millions of children and adults are facing the coming winter with the prospect of having little warm clothing. It is known, too, that there will be a serious shortage of fuel. In an effort to ease this situation an appeal has been made for used clothing to be sent to Europe this Fall. Canada is participating in this undertaking and the Dominion has been asked to provide ten million pounds of warm clothes, to help to improve conditions for those whose families and homes have been in the direct path of war. The people of Canada have helped a great deal in the liberation of Europe, and there is no doubt but they will now respond generously to this opportunity to contribute to the comfort of the people there.

## GEMS OF THOUGHT

### FOLLOWING THROUGH

When you get right down to the root of the meaning of the word "succeed", you find that it simply means to follow through.—F. W. Nichol.

If a man does not know to what port he is steering, no wind is favorable to him.—Seneca.

The roads leading to distinction in separate pursuits diverge, and the nearer we approach the one, the farther we recede from the other.—Bovee.

Be thorough in all you do and remember that though ignorance (or) may be innocent, pretension is always despicable.—W. E. Gladstone.

Religions may waste away, but the fittest survives; and so long as we have the right ideal, life is worth living and God takes care of our life.—Mary Baker Eddy.

True happiness is to no spot confined. If you preserve a firm and constant mind, 'Tis here, 'tis everywhere.—John H. Wayne.

## Change Of Vocation

Woman Released From The Service In England Got A Surprise

A Wren who has just been released from the service tells of a surprising change of vocation attributed to her by the demobilization officer.

"What was your profession before enlisting?" asked the officer.

"None," replied the Wren, who had joined the service on leaving college. Only when the formalities had been completed did the astonished head discover that her answer had been spelt "Nun."—Manchester Guardian.

It requires about a ton and a half of coal to make the coke to smelt a ton of pig iron to make steel.

**JUST RUB ON MINARD'S LINIMENT**

## Price Control And Rationing Information

Q.—How does the cost of living compare now with the cost of living at the end of World War I?

A.—In July, 1920, the cost of living in Canada was 89.7 per cent higher than at the beginning of World War I. In July, 1945, the cost of living was only 18.7 per cent higher than at the outbreak of World War I in 1939. By paying no more than ceiling prices, Canadians can help to keep today's cost of living from going higher.

Q.—I wish to rent a furnished house. Must the landlord have the price set the same as on an unfurnished house?

A.—Yes, the rental must be fixed on a furnished house. The owner should apply to the nearest rental office, and an appraiser will inspect the house and set the maximum rental which may be charged.

A.—Why are all meat products included in the list of meats which will be rationed?

A.—Because the ration plan is to decrease consumption. During the last ration program some meats were not rationed and the total national consumption actually rose above the normal consumption.

Q.—Are clubs and organizations planning welcome home celebrations for returning servicemen allowed to apply to the Ration Administration for additional rations?

A.—The Wartime Prices and Trade Board is very much in sympathy with welcome home receptions but it cannot afford to allot extra rations. Organizers of such receptions must, therefore, use individual members' ration allowances if they serve refreshments involving rationed foods.

Please send your questions or your request for the pamphlet "Consumers' News" or the Blue Book in which you keep track of your ceiling prices, mentioning the name of this paper to the nearest Wartime Prices and Trade Board office in your province.

## Self-Sacrifice

Britain Taking Less From Overseas Sources Than When War Was On

Back in September of last year it was estimated that UNRRA would have to care for 100,000,000 Europeans this coming winter. That was before Russia made its request for help.

The 47,000,000 people of the United Kingdom are not included, of course, which is a source of bewilderment to many a Canadian who feels that the people of Britain ought, after six years of privation, to have some reward for serving as the bulwark of freedom.

The British, in fact, are taking less today than they did on the average while the European war was raging. The little islands can not ship foodstuffs to Europe, since they must import much of their own food; therefore they take less from overseas sources so that more may be sent to the shattered continent. There is an object lesson here in self-sacrifice.—Vancouver Sun.

## NEW MUSTANG SPEEDY

The new P-51H, Mustang, is the world's fastest propeller-driven airplane. It will travel well over 460 m.p.h. It is good for high altitudes flying and has a long flying range.

**LORD OF ADMIRALTY**—A former Royal Navy stoker, Walter James Edwards, has been appointed Civil Lord of the Admiralty by Prime Minister Attlee. The 44-year-old veteran of two wars, rejoined the navy in 1929 as leading stoker and saw action off Dunkirk, in the Lofoten raid and with Arctic convoys to Murmansk.

## Prairie Wolves

Number Of Pelts Marketed Are On The Increase

Figures compiled by W. M. Ritchie, chief, Fur Inspection and Grading Services, Dominion Department of Agriculture, would indicate that the number of skins of prairie wolves are on the increase, based on the number of skins offered at auction sales during the past 10 years. In the 1934-35 season, the number offered was 53,048, which sold at an average price of \$43.77 each. The number sold in 1943-44 was 65,712 at an average price of \$13.27. In the 1940-41 season, only 28,265 prairie wolf pelts entered the market. Most of the pelts come from Alberta and Saskatchewan, but some are from Manitoba and British Columbia.

While statistics show that more prairie wolf pelts offered for sale to fur dealers have increased in number each year for the past ten years, the reverse is the case with timber wolves. Ten years ago, 12,000 of the latter entered the market. Last year the number was 9,260. Most timber wolves are caught in the northern districts of Manitoba, British Columbia, Saskatchewan and Alberta. Several hundreds come every year from the Yukon and North West Territories and a few from Quebec. The fur is used for trimming coats and other garments.

## A Rare Instrument

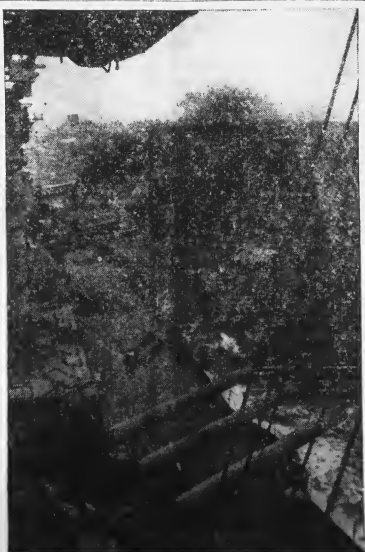

Can Predict The Tide For Any Date At Any Place

A firm of London manufacturers has just constructed Russia's first modern tide predictor. It is to leave England for the Soviet Union within a month. This new machine is an exceedingly delicate and rare instrument—there are scarcely one dozen modern predictors in the world.

It has 30 components which represent the variations of the attractive forces of the moon and moon. When these components are set, the tide can be predicted for any date and any place in the world.

The tide predictor made possible the planning of Allied landings in Italy and Normandy and later played an indispensable part in the Far Eastern war. The new machine was made for the Soviet Union in response to a request from Russian experts. It weighs about one ton and took two years to make.

Oaks are more likely to be struck by lightning than are other trees.

MEET A CWAC—

"I'm A.I. in the Army and a grandmother," proudly stated Cpl. Ruby Ward, of 468 Onimica Street, W. Moose Jaw, Sask. Cpl. Ward enlisted in the Canadian Women's Army Corps, in June, 1945. After completing Basic Training at Vermilion, Alta., she was posted to Documentation No. 12 District Depot, Regina, Sask. Not only did she do her work during the day but she held night classes in shorthand and typing for seven months, working 5 nights a week. In Jan., 1945, she took an Advanced Admin. Course at Brockville, Ont. Cpl. Ward was then posted to No. 12 V.T.S., Saskatoon, Sask. where she taught Administration to CWAC personnel. Always full of energy and ambition, Cpl. Ward took lessons in tap dancing and aerobics for 4 years prior to her enlistment as well as lessons in swimming and club swinging.

"I am a member of the Rebekahs," she went on to say, "and was secretary for the Rebekah Assembly of Moose Jaw, before enlistment. Her two sons are living at home, Raymond, the younger of the two, having recently received his discharge from the RCAF.

At present Cpl. Ward is a private secretary to Major Henry Lewis, Senior Army Examiner.

## WOMEN IN UNIFORM—

The Canadian Women's Army Corps, who were first officially organized on August 13, 1941, have been celebrating their fourth anniversary in the knowledge that they have performed an essential task in the Canadian Army, which released thousands of men for more active duties.

They have worked as cooks, drivers, clerks and messengers in Canada, England and on the Continent, and everywhere their quiet, efficient discharge of their duties has been such as to win them warm praise from the highest military quarters.

Despite the fact that their duties were non-combatant, they have often known great personal danger, particularly those serving in the London and Antwerp areas, when these two cities became the German army's chief targets for heavy bombs and rockets. On all occasions, when their safety was endangered, their conduct has been exemplary, and they have never permitted danger to interfere with their work. All Canadians wish them well as they observe their anniversary, and thank them for a job well done.

## DENTAL ASSISTANTS—

When the first time in the history of the Canadian Dental Corps, women of the three services are performing the duties of the chair assistants to Army dental officers to Navy, Army and Air Force establishments.

When the Canadian Dental Corps was first organized, soldiers were employed as dental assistants, and trained as reinforcements for the C.D.C. overseas. On formation of the Canadian Women's Army Corps, a number of CWAC personnel were assigned duties as dental assistants, but the majority continued to be male personnel in order to keep sufficient overseas reinforcements available. Today, the 410 C.D.C. women dental assistants, 212 are members of the Canadian Women's Army Corps, 75 are Wrens and 80 are W.D.'s.

A special six weeks course to teach women personnel their new duties was inaugurated at the C.D.C. Technical Training Centre, Toronto, Ontario, where CWACs and W.R.C.'s worked and lived together.

"Women have proved of inestimable value to us in our work," C.D.C. official said. "The Canadian Dental Corps has performed over 15 million operations, since the beginning of the war, and women have played their part. They have augmented the efficiency of the work; they are indeed grateful to them. They have stepped into the breach and are carrying on the work in true military fashion."

## SHELLS SET EVERYTIME—

Pte. Buttner: "Did you hear what excuse Emperor Hirohito gave for surrendering?"

Pte. Penelope: "No, what was it?"

Pte. Buttner: "Velly sorry, got atomic ache."

The cyclists blink from three to six times a minute.

## Canadian Army Corps

Now Adds A New Proud Word To Its Title

The Canadian Armored Corps is adding a proud new word to the little under which its various formations fought so gallantly in the recently-ended campaign in Europe. From now on it will be known as the Royal Canadian Armored Corps.

Defence headquarters announced that authority to use the "Royal" prefix had been granted the Corps by the King. Royal assent was given Aug. 2 and the new title of the Corps became effective as from that day.

In its short span of existence the Royal Canadian Armored Corps has won outstanding reputation in the comparatively new field of armored warfare. Canada had no tanks prior to 1940, but in the short space of three years was able to send a well-equipped and trained tank brigade into the Sicily campaign and to add a few months later a full armored division to the battle of Italy.

A year later this force was duplicated with yet another tank brigade and another armored division in action on the beaches and in the fields of Normandy.

## SMILE AWHILE

A Swedish farmer who wanted to make his permanent home in this country appeared for his naturalization papers.

Inquirer: Are you satisfied with the general conditions of this country?

Swede: Yahl, sure.

Inquirer—And does this government of ours suit you?

Swede:—Well, yahl, mostly, only I lak see more rain.

Boss: "Yes, I want an office boy. Do you smoke?"

Boy: "No, thank you, sir, but I don't mind having an ice cream cone."

"Be sure to write on them labels which medicine is for the horse and which is for my husband," said the farmer's wife to the druggist. "I don't want nothing to happen to that horse before we finish the spring sowing."

Little Maria on her first visit to a farm was watching the hired man milk the cows. He offered her a glass of fresh milk.

"Well, what do you think of it?" asked the hired man.

"It's awful good," replied Marie, smacking her lips. "I wish our milkman had a cow."

Judge: "What's the charge against this man, officer?"

Officer: "Bigotry, your honor. He's got three wives."

Judge: "I'm surprised at your ignorance, officer. That's tri-nometry, not bigotry."

Mother—I don't see why you kept George after school.

Teacher—I asked him who George Washington was, and he just looked at me.

Mother—And well he might! Such ignorance would dumbfound any one.

"Son, why don't you play circus? It's great fun. First you make a sawdust ring—"

"But where would I get the sawdust, dad?"

"Here's the saw. Just cut some of the firewood into fireplace lengths. And you can have all the sawdust you make."

Historians estimate that gloves were in use more than 3,000 years ago.

## Swift Ease for Miserable BACKACHE

Don't tifle with that backache, because backache, along with leg cramps, restless nights, puffy eyes, rheumatic pains and frequent headaches are the signs that your kidneys are lazy. Get relief—quickly—with GOLD MEDAL Haarlem Oil CAPSULES.

GOLD MEDAL Capsules will give you relief and help you get back on the job, filtering your blood, and removing the trouble-causing waste acids and poisons.

GOLD MEDAL Capsules contain accurately measured amounts of the genuine and original Dutch Drops, known the world over for their swift effectiveness.

That's why you can count on GOLD MEDAL Capsules for relief. Be sure you get the genuine GOLD MEDAL Haarlem Oil CAPSULES. Get the 4c box from your druggist.

## SHIPS MAY BE DIVERTED FROM OTHER ROUTES TO PICK UP GRAIN AT CHURCHILL

OTTAWA.—Although there are now 1,577,737 bushels of wheat, about eight average ship cargoes, in storage at Churchill on Hudson Bay, the British ministry of war transport at Montreal has no information yet as to whether ships will be diverted there to pick it up.

The navigation season at Churchill extends on the average from Aug. 5 to Oct. 10. It is up to the British food ministry in London to say whether ships should be diverted from other routes to pick up these cargoes at Churchill, according to local authorities in Ottawa.

In the meantime, the port facilities at Montreal and Quebec are being pushed hard to handle cargoes of wheat now flowing in from the west. This is due to the fact that the influx of ships seeking cargoes at those ports has been so great that they have absorbed the wheat flowing in from the lakehead faster than it could accumulate in the elevator storage at Montreal and Quebec.

The result is that considerable pressure is being exerted on the food ministry in Britain to send ships to Churchill to pick up the cargoes there. But here the difficulty arises in the immediate shortage of shipping in the Allied shipping pool, under terrific pressure for ships for all purposes, especially in supplying troops still in Europe and the Pacific. The present situation raises some interesting speculation concerning the future of Churchill on Hudson Bay as an outlet not only for western grain, but a part of supply to the western provinces.

The short navigation season at Churchill has always been quoted as a reason for the lack of ships sent there to pick up cargoes.

Astonishing development of radar, which enables ships as well as airplanes to navigate at night and through the most dense fog by sending out radio waves which bounce off nearby objects such as islands, headlands, other ships, icebergs and other obstacles and are reflected back to the sending ship, has raised the question of whether installation of such equipment might not greatly extend the navigation season at Churchill.

### WANTS WHEAT

France Would Import 350,000 Tons A Month From Canada And U.S.

OTTAWA.—France is anxious to obtain a "substantial amount" of wheat from Canada and arrangements to supply the wheat now are entering final stages, Trades Minister MacKinnon said.

He was commenting on a Paris dispatch which quoted French Minister Christian Pineau as saying that France would start importing 350,000 tons of wheat a month from Canada and the United States.

The amount of wheat France will obtain from Canada has not yet been set, said Mr. MacKinnon. The amount and financial arrangements for payment of the wheat were matters still under discussion.

Birds all over the world use mouth secretions as cement in making nests of mud, sticks, grass, hair and feathers.

## BRITAIN SHOWS ANXIETY OVER FUTURE CONTROL OF USE OF THE ATOMIC BOMB

LONDON.—Parliament opened a full debate on a resolution for approval of the United Nations charter with the prospect Britain would soon ratify it, and with the possibility that some statement of principle on international control of atomic power might be added to the resolution.

Throughout the debate there ran an overtone of anxiety about control of the atomic bomb.

Scarcely a voice was raised against the charter, hailed by Prime Minister Attlee as a great instrument for world peace, as the new Labor government asked for its approval in commons and the house of lords.

Mr. Attlee in introducing the resolution declared "We are now faced with the naked choice between world co-operation and world destruction."

Placing the atomic bomb under international control was urged by Sir Arthur Salter, Independent.

"How obsolete the military provisions in the charter seem in the light of this new weapon unless it is controlled," he declared, adding that it would "be impossible or intolerable for any single government or people—our own or any other—to hold on to this secret alone permanently or for any long period."

There appeared no doubt the charter would be ratified by Great Bri-

### AT LOWEST EBB

Immigration Index For Canada Has Dropped During The War

OTTAWA.—Canada's immigration index, a series of ups and downs since 1900, is currently at its lowest ebb in 45 years because of the war but whether policy changes will be made to swing it up again on a lot of things, government officials aren't quite ready to answer just yet.

There was a big lull on a wave of assisted immigration between 1920 and 1925 and again between 1929 and 1932. Between those periods and since then the index dropped sharply until it slid to a total of 7,445 immigrants in 1943, compared with 382,841 in the peak year of 1913. Total immigration last year was 9,040, which officials term "practically none."

Officials admit there are going to be a lot of people wanting to come to Canada when the transportation situation settles.

But with Canadian and U.S. servicemen homebound from Europe at a maximum rate, there just isn't any room for immigrants aboard trans-Atlantic liners.

Immigration officials expect the servicemen-priority curb on ocean shipping will remain for a time yet and will give Canadian government authorities time to decide whether to allow the immigration index to climb back to pre-war figures or hold it in check.

### WILL USE RADAR

Experimental Station For T.C.A. Has Been Installed At Winnipeg

WINNIPEG.—In order to apply the wartime miracle of radar to increase the safety of commercial air travel an experimental radar station has been installed at Stevenson Field, Winnipeg, by Trans-Canada Air Lines, according to R. M. Stevens, T.C.A.'s superintendent of communications and electronics.

"The installation, which was only made possible by the loan of appliances by the R.C.A.F., is not of a permanent nature," R. M. Stevens said, "and is being designed for experimental use by the company's communications department." The National Research Council, Ottawa, is co-operating with T.C.A. in tests which are being made.

### POLICIES EXTENDED

Expiry Date For War Risk Insurance Has Been Changed

OTTAWA.—Finance Minister Isley has announced that government war risk insurance policies in force Aug. 17, 1945, have been extended without payment of further premiums for a period of three months from their expiry date.

He indicated that before the expiry date of the three months period, the government would announce whether the war risk insurance scheme would be ended or continued for a further period.

A total eclipse of the moon, to be visible in North America, Asia and Europe, is scheduled for Dec. 18 and 19, 1945.

Britain, since it was endorsed both by the Attlee administration and by Anthony Eden, foreign secretary in the wartime coalition.

Mr. Attlee said collective security was not merely a promise to act when an emergency occurred, but was active co-operation to prevent emergencies from occurring.

"The success of the new world organization will depend not so much on the exact provisions as on the spirit in which they are worked. If a great power is resolved not to carry out the principles of the charter, then no paper provisions will restrain them," Mr. Attlee declared.

In the house of lords, Lord Jowitt, lord chancellor, contended the charter contained "the difference between life and death for civilization as we know it."

He declared the secret of the atomic bomb could not be kept indefinitely, and that to try to do so would only encourage in every country research in methods of destruction.

Mr. Eden said the "charter is here. . . . We must all join to give it life and work."

He expressed opinion the mistakes of the League of Nations had been rectified in the charter, and said it was a good thing that the charter was being signed with the post-war peace settlement.

**EARLY ATOM EXPERT**—A former Canadian, Prof. Arthur J. Dempster, of the physics department of the University of Chicago, is one of the real authorities in America on the atom. Prof. E. F. Burton of the University of Toronto said. Prof. Dempster developed an instrument called the mass spectrograph which has been of the most importance in this work.

### OFFERS OPPORTUNITIES

TORONTO.—James A. Taylor, president of Toronto Metals Ltd., who returned to Toronto recently from a seven weeks' tour of Britain, said in an interview that Europe's reconstruction period will offer great opportunities to Canadian exporters, but that the final solution to world trade problems lies in the direction of lower tariffs.

The official language in Panama is Spanish.

For ten years Generalissimo Chiang Kai-shek and his gracious U.S.-educated wife, have guided China in fighting the advancing Japanese hordes.

### SHIP CONTRACTS

British Columbia Yards Will Finish Work Now On Order

MONTREAL.—D. B. Carswell, director-general of ship-building for the munitions department, said there will be no further cancellations of ship contracts in British Columbia yards and that all work now on order will be completed.

This includes 15 coastal vessels being built for China. Canada stands a good chance to obtain further ship-building orders from China as a result of a move by the Dominion government to establish credit of Chinese companies in Canada.

### JAPANESE ORDER

Government Instructs People Not To Fraternize With Landing Forces SAN FRANCISCO.—The Japanese government, on the eve of Allied occupation of its homeland, issued a non-fraternization order.

The statement said: "In regard to the supplying of living quarters and food to the Allied landing forces, the army and government will assume full responsibility."

"There will be no contact between the general public and the landing forces. We emphasize this point."

### MUST BE DECLARED

MONTREAL.—The Belgian embassy in Montreal said that all persons and institutions in Canada, possessing Belgian banknotes of 100, 1,000 and 10,000 franc denominations, which they held on Oct. 9, 1944, must declare these notes and deposit them with the Belgian embassy in Montreal.

## THE TRANSITION FROM WAR TO PEACE IS COMPLICATING PROBLEMS OF RECONVERSION

OTTAWA.—Several quarters indicated Canada has been plunged into the thick of its post-war industrial conversion problems within a matter of days after the collapse of Japan.

The sudden end of the war in the Pacific brought the difficulties of transition from a war to a peace economy down on the shoulders of the government and industrialists far faster than had been anticipated; but, in official government circles at least, there was confidence that once the immediate and most acute period of change over had passed, Canada would be well-lunched on post-war civilian production.

Reconstruction Minister Howe sounded an encouraging note on this theme when he said in an interview that the position of practically all war contracts has been clarified and industries have been informed where they stand. As a result it was expected the most difficult stage of reconversion would be passed by autumn.

A large part of the war contract cancellations already were in effect, Mr. Howe said. In other cases there would be a gradual tapering off of the manufacture of war materials. Along with the termination of war contracts the government was proceeding with the disposal of war plants, property of the crown.

Mr. Howe announced, for instance, that Small Arms Ltd., a crown company at Long Branch, Ont., near Toronto where a strike was in progress for three days, will be sold. The strike followed announcement by the management of intention to lay off some 850 to 900 workers following the termination of contracts.

It was known that industrialists have shown a keen interest in the purchase of many of the government-owned plants and a number already have changed hands. In some cases a multiple-occupancy plan was being divided and parts leased to small companies.

This officials said, fits in with the announced policy of encouraging small companies and may prove an important factor in speeding the switch to peacetime industry.

Although lay-offs lately have brought reconversion worries more sharply into focus, officials have found considerable satisfaction in the fact that the number of war workers has dropped to probably less than one-quarter of the peak figure of 900,000. At V-E day there were 650,000 working in war plants and more than 230,000, and there still was a large backlog of unfilled jobs.

Wages are one of the conversion period headaches to which official circles are devoting a good deal of thought but saying little for publication.

The declared policy of the government is to maintain a high national income, which means that reasonably high wage rates must be maintained; but there are a lot of complications, particularly in the present stage when workers are shifting from war to peacetime jobs.

Government officials have been deluged since V-J day with telegrams and letters from labor union, other groups and individuals all demanding that their wages be maintained at the wartime rate.

One of the factors that makes this difficult, in some cases at least, is that workers cannot always be placed in peacetime jobs where they can use to the full the skill they were being paid for in war plants.

Another factor is what is known as "upgrading." In Canada's war industry the ratio of common laborers to other occupations has dropped sharply. It is common knowledge that many employers "upgraded" by giving workers new titles to enable them to receive higher wages. Thus a laborer in a plant might be restricted under the wartime wage restrictions to 50 cents an hour, but if he became a carpenter's helper he could go into the 60-cent bracket.

Once labor becomes more readily available the urge to "upgrade" will be removed and that particular worker will probably have to seek a job again as a laborer unless he can find a job in which he can use his war-acquired skill.

## CASH INCOME FROM THE SALE OF FARM PRODUCTS SHOWS LOWER TREND FROM LAST YEAR

OTTAWA.—Cash income from the sale of farm products in Canada for the first six months of 1945 amounted to \$702,000,000, approximately \$62,000,000 less than in the corresponding period of 1944, the Dominion bureau of statistics reported.

Except for a minor amount in Nova Scotia, the three prairie pro-

vinces accounted for all the decrease in income. The largest decrease—\$51,000,000—occurred in Saskatchewan, followed by substantial decreases of about \$25,000,000 in Alberta and \$15,000,000 in Manitoba. These declines were offset in part by increases in other provinces which in Ontario amounted to nearly \$23,000,000, with the remainder of the provinces showing smaller increases.

The income in the prairies was down chiefly because of reductions in marketings of wheat and hogs during the first half of 1945, compared with the unusually heavy marketings during the first six months of 1944. Increased marketings, chiefly of cattle and calves and of oats, helped to offset part of the decline, the bureau said.

The prospect of a reduced production of field crops indicates that marketings from this source during the last six months of 1945 will be substantially lower than during the last half of 1944, the bureau said. Income from livestock products may not change greatly as the expected decline in sales of hogs may be offset by heavier marketings of cattle and calves. Thus with a lower income already established for the first six months of the year, it seems probable that the income of Canadian farmers in 1945 will be moderately below the record year—1944.

Payments made under the Wheat Acreage Reduction act, the Prairie Farm Assistance act, and the Prairie Farm Income act, are not included in these estimates of cash income from the sale of farm products. The estimates do include, however, the amounts paid, during the periods covered, on account of wheat participation certificates, the oats and barley equalization payments and those Dominion and provincial government payments which farmers received as subsidies to prices.

Over-all production of maple products this season was down sharply from a year ago and was smaller than average.

### MEMORIAL PARK

OTTAWA.—A national park running through the Gatineau hills near Ottawa may designate as Canada's national war memorial to all men who fell in the Second Great War. Prime Minister King announced passage of two orders-in-council extending boundaries of the federal district into the Gatineau hills on the
